Lead Nurture AI

Technical User Documentation

By: Daughpane S. Reponte

Prerequisites

Requirement	Details
Python	Version 3.10 or higher
VS Code	Recommended IDE with Python extensions
Google Account	For Google Sheets + Google Cloud Console
Groq Account	Free at console.groq.com
Zapier Account	Free tier at zapier.com (100 tasks/month)
Git	For cloning the repository

Project Structure

```
leadnurture-ai/
├── venv                  # virtual environment
├── .env                  # Environment variables (do not share)
├── .gitignore            # Files ignored by git
├── credentials.json      # Google Service Account credentials (do not share)
├── export_workflow.py    # Zapier export json script
├── generate_email.py     # Main script
├── requirements.txt      # Python dependencies
└── README.md             # Project description
```

Installation and Setup

---

1. **Clone and Create Virtual Environment**

```
git clone https://github.com/daughpane05/leadnurture-ai.git
cd leadnurture-ai
python -m venv venv
venv\Scripts\activate # Windows source
```

```
venv/bin/activate # Mac/Linux
pip install -r requirements.txt
```

2. **Configure Google Cloud**
   - Go to console.cloud.google.com and create a new project.
   - Enable Google Sheets API and Google Drive API.
   - Create a Service Account under IAM & Admin → Service Accounts.
   - Download the JSON key and rename it credentials.json.
   - Place credentials.json in the project root directory.
   - Open your Google Sheet → Share → paste the service account email → Editor access.

3. **Configure Environment Variables**

   Create a .env file in the project root with the following keys:

```
GROQ_API_KEY=your-groq-api-key-here
SENDER_NAME=name-of-sender
SENDER_COMPANY=name-of-company
```

   Get your free Groq API key at console.groq.com → API Keys → Create New Key.

4. **Google Sheets Schema**

Column	Header	Description
A	Lead ID	Unique identifier (e.g., 001, 002)
B	First Name	Lead's first name
C	Last Name	Lead's last name
D	Company	Lead's company name
E	Email	Lead's email address
F	Country	Lead's country
G	Industry	Lead's industry
H	Status	New → Email Generated → Sent

I	AI Email Subject	Auto-filled by generate_email.py
J	AI Email Body	Auto-filled by generate_email.py
K	Date Added	Date lead was added

Script Reference

`Main function (generate_email.py)`

Function	Description	Returns
generate_email(lead)	Calls Groq LLaMA 3.1 with a structured prompt to produce a personalized email for the given lead dict.	tuple[str, str] — (subject, body)
process_leads()	Iterates all rows in Sheet1. For rows where Status == 'New', calls generate_email() and writes results back to columns I, J, H.	None — updates sheet in place

`Groq API Configuration`

Parameter	Value	Notes
Model	llama-3.1-8b-instant	Fast, free, 14,400 req/day limit
Max tokens	~300 per response	Sufficient for email subject + body
Temperature	Default (1.0)	Balances creativity and consistency
Rate limit	30 req/min free tier	time.sleep(3) added between leads

`Zapier Workflow Configuration`

Step	App	Event	Key Configuration
Trigger	Google Sheets	New or Updated Row	Trigger Column: H (Status)
Filter	Zapier Filter	Only continue if	Status equals 'Email Generated'
Action 1	Gmail	Send Email	To: {{Email}}, Subject: {{AI Email Subject}}, Body: {{AI Email Body}}, From Name: LeadNurture AI

Step	App	Event	Key Configuration
Action 2	Google Sheets	Update Spreadsheet Row	Column H → 'Sent'

Running the Scripts

Process Leads

```
python generate_email.py
```

Expected output:

```
Processing: Full Name
Processing: Full Name
Processing: Full Name
Done processing all new leads.
```

Export Workflow JSON

```
python export_workflow.py
```

Generates zapier_workflow.json in the project root with the full workflow structure and test run results pulled from your Google Sheet.

Security Notes

- Never commit .env or credentials.json to version control.
- Add both to .gitignore before your first git push.
- Rotate your Groq API key periodically via console.groq.com.
- The Google Service Account should have minimum required permissions (Sheets + Drive only).

Make sure to add this .gitignore file:

```
# .gitignore
.env
credentials.json
venv/
```

Follow-up on Outsourcing Talent Opportunities for AU Works, Hawaii

dsreponte@gmail.com
to angel

Apr 26, 2026, 5:53 PM (13 hours ago)

Hi Angel,

I hope this email finds you well. It's LeadNurture from GoTeam, and I wanted to follow up on our previous conversation about exploring talent outsourcing opportunities for AU Works. As we discussed, partnering with us can help you access a skilled workforce from the Philippines, allowing you to scale your business efficiently and effectively.

Our clients in the business sector have seen increased productivity and cost savings by leveraging our talent outsourcing services. I'd love to take a deeper dive into how we can tailor our solution to meet your unique business needs. Would you be available for a 30-minute discovery call to discuss further?

Please book your call time here: https://calendly.com/go-team/aangel-uno

Best regards,
LeadNurture AI
GoTeam
